### EXPERIENCE

#### Inediti

**February 2022 - May 2022 (Codeigniter, Bootstrap, MYSQL)**

- I was developing new features for the established applications
- I was working with different applications to add them in the company, I tested them and showed them to my bosses.

#### Capgemini

**March 2021 - November 2021 (COBOL, DOCUMENTATION)**

- Modify and creation of documentation.
- I was in a Trainee program where I learned COBOL

#### Movies CRUD

**November 2021 (Angular, NodeJs and Material Design)**

- I developed a crud for movies with angular, material design and NodeJS from scratch for a school work.

#### OPTIMEN

**2021 (NODEJS)**

- I was part of a project for the company optimen where I was in charge of making updates to the database from frontend, and a log of the table

#### Professional Practices

**2021 (ASP. Net)**

- An application similar to that of Home Deppot (departmental sales) was developed

#### Small CRUDs

**2018- 2022 (Javascript, Html, Css, MYSQL, Laravel)**

- Throughout my university I was developing cruds with different frameworks or languages,

#### Self-taught projects

**2018- NOW (JavaScript, Laravel, Nodejs, Python)**

- I love learning new technologies and being self-taught, that's why I've developed some projects from YouTube videos

#### DATA App

**2021 (Panda, NumPY, Python)**

- I developed a web application with Python where Pandas was used for data visualization.
